1 Issues

Affects	Description	Fixed in version
Power Monitor	Not yet characterised	-
CDI	Servo power down descriptions swapped 'Servo remain active' should read 'Servos power-down (recommended)' and vice-versa	1.2
CDI	Servo positions not updated correctly	1.2
SNII response	Uses wrong error code if buffer full	1.4
CDI	Fails with strict xml parser	1.4
Accessing configuration memory	Optional space in byte 6 is used as length parameter	1.4
Button event identification	Blue/Gold button events are identified as consumers	1.4
ACDI memory layout	Format of 251 and 252 spaces is oncorrect	1.4
Memory read request flags	Datagram received OK message should include reply pending flag	1.4
ButtonLED I/O	I/O channels configured for ButtonLED do not work	1.4
Blue button	On (button down) events are not produced	1.4
Servo position reporting	Poition reporting events may be produced out of order	1.4
Blue/Gold buttons	Do not produce events as expected for non-default configuration	1.5
Blue/Gold LEDs	Do not display CAN activity as expected for non-default configuration	1.5
Output pulse modes	Timers pulse widths are longer than expected. DO not work at all on bank B	1.5
Input producer events	Only P1 event is produced	1.5
Servo position events	Only produced for channel 1	1.5
I/O at startup	Spurious PCE reports at startup depending on I/O state	1.5
I/O at startup	False input changes detected at startup	1.5
Pulsed outputs	Do not work correctly on bank B	1.5
Servo test mode	May not work after non-default configuration	1.5
