

USB-LCC LCC® USB Computer Interface

Features:

- USB interface for NMRA LCC and OpenLCB™
- Galvanic isolation between USB and LCC network
- Two bi-colour status LEDs
- Supported by JMRI
- Implements an LCC node
 - LCC bootloader for firmware upgrades
 - Via Host or network
 - Two configurable LED functions via CDI
- Dual RJ45 for network pass-through or terminator
- Uses standard FTDI drivers included with Windows, MacOS, Linux
- Computer side is USB bus powered
- Network side is powered from LCC

Easily connect a computer (Windows, MacOS or Linux) to your LCC network. Supported by JMRI for network configuration and layout operation.

LCC® is a registered trademark of the NMRA

OpenLCB is a trademark of the OpenLCB Group
